### **KOKATAT INTRODUCES NEW TROPOS 3-LAYER FABRIC TECHNOLOGY**

Arcata, CA – In a further expansion of the successful TROPOS waterproof/breathable fabric program, Kokatat introduces a new 3-layer fabric called T3. The lightweight tricot backer knit offers more comfort through better wicking capability by providing a moisture management layer between the paddler and the TROPOS coating. This third layer also provides extra durability by protecting the TROPOS coating from interior abrasion.

New products for 2009 that will be made using the T3 fabric include the SuperNova Angler Paddling Suit, Tempest Paddling Pant, and the Launch Sock. The TROPOS Swift Entry Dry Suit and the TROPOS Meridian Dry Suit will now be made with the T3 fabric. All socks on TROPOS paddling and dry suits will also be made with the new T3 fabric to provide increased comfort and durability. 2009 will bring an exciting new color, pacific, in the men's dry suits and SuperNova Angler.

*Tempest Jacket and  
Pant with Socks*
